**A solution that serves the Israeli non-profit and its international “Friends of” organization**

## The problem: 4 different systems

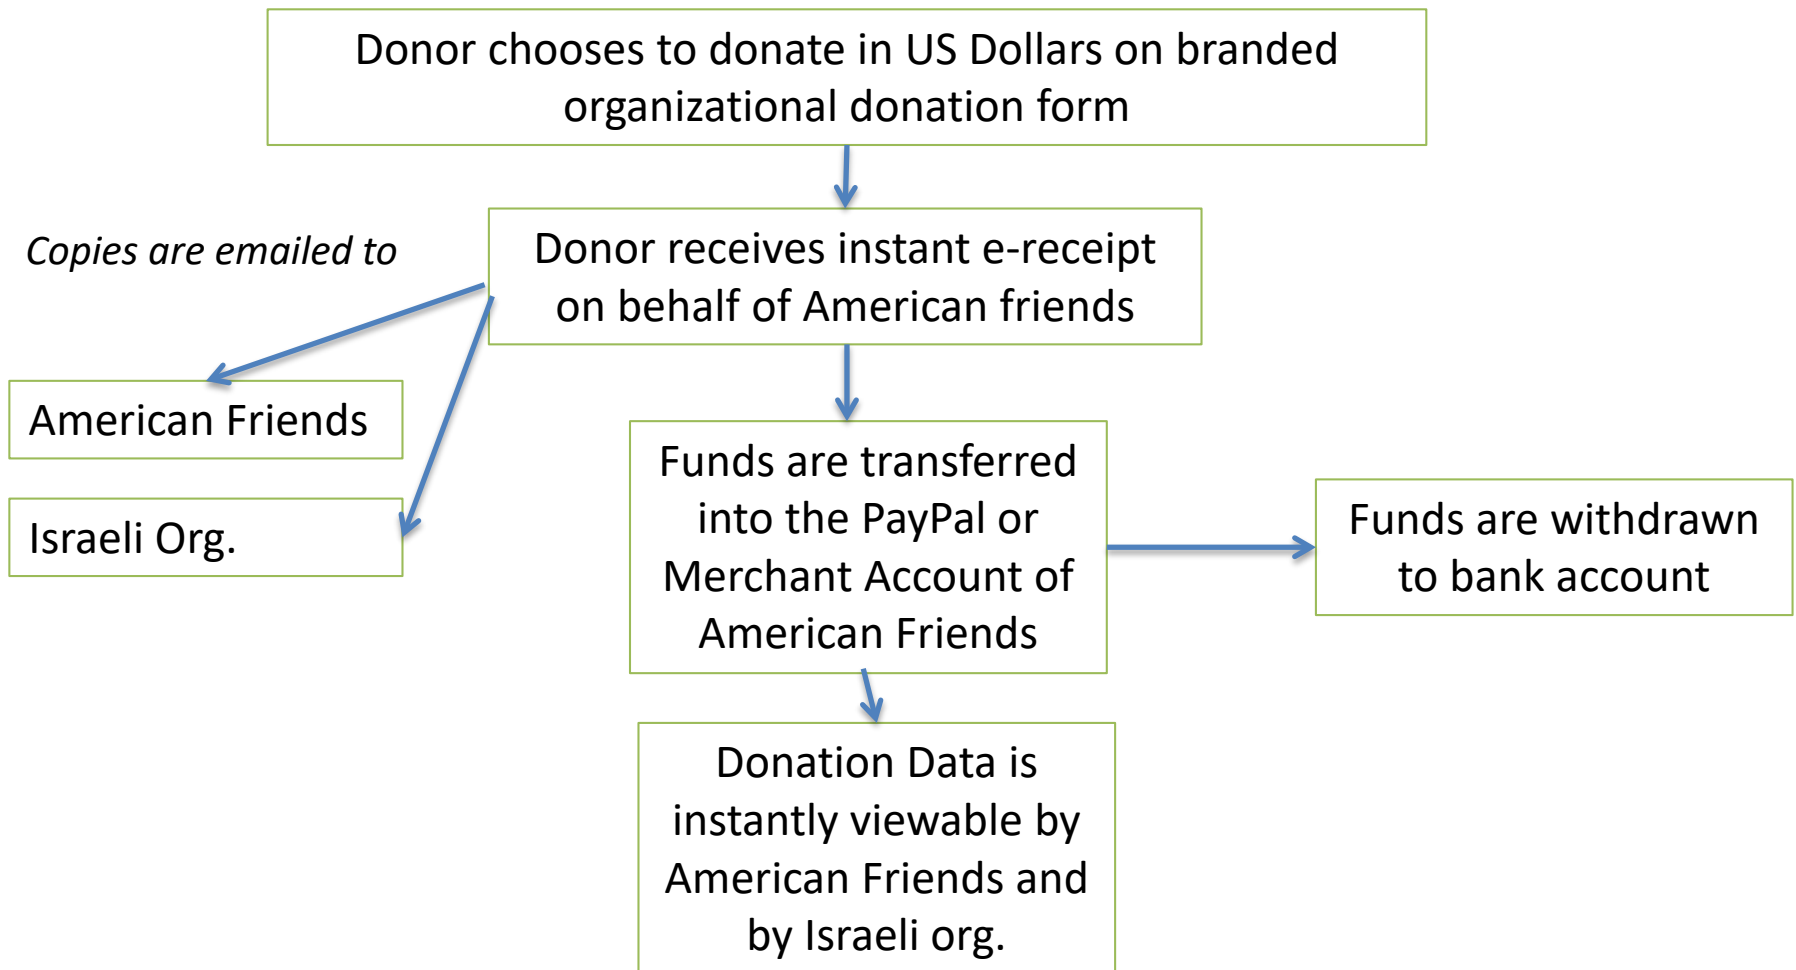

- Expensive: 4x the cost
- Inefficient: Donor information is in 4 separate systems
- Loss of control: You don't always get access to donor data, particularly not in real time
- Campaigns: Fundraisers can only create a campaign that's connected to a single currency
- Currencies/Languages: Hebrew form only shekels, English form only dollars, etc. discounts Hebrew speakers who want to donate in dollars, and English speaker who wants to donate in shekels

## **The IsraelGives Solution: A single donation and fundraising gateway that serves all partner organizations**

- **Donation is routed to partner organization via currency selected**
- **190 countries and currencies supported in 6 languages.**
- **Automated e-receipting on behalf of all organizations**
- **All donor, donation, honoree, receipt information is in one single database**
- **Every organization receives access to donor details, while Israeli organization has full oversight**
